

Deep Security

SECURITY TODAY

Providing **Managed Security Services**

Specializing in:

- » Enterprise Vulnerability Risk Assessments
- » Penetration Testing
- » HIPAA Security Assessments

OUR VISION

Deep Security was founded to meet the needs of **rapidly growing demands** of information security within many industries, primarily driven by recent information security breaches, federal regulations and complex cyber attacks.

OUR GOAL

Ensure organizations **Defense in Depth** is adequately and properly configured in a secure manner. We promote high quality IT hygienic procedures that adhere to HIPAA, ISO 27001 IT Governance and other industry best practice security standards.

WE PROVIDE

Customized security services, solutions to identify and remediate any security issues within your IT infrastructure. We take pride in our recommendations, identifying and addressing gaps in the security stack.

MORE THAN A SERVICE

We provide more than just a **service**, tailored to each client with deep technical knowledge to each environment that we assess.

Deep Security has an in-depth focus and 75+ years of experience within the healthcare vertical as well as several other industries.

MANAGED SECURITY SERVICES

Deep Security's staff of subject matter experts (SME) will execute the most secure methods of remediations and on-going management lifecycle.

A blue staircase graphic with a circular dot at the end of each step, leading to the first service item.

Weekly Vulnerability Scanning Internal and External targets

A blue staircase graphic with a circular dot at the end of each step, leading to the second service item.

Bi-weekly meetings to review progress on remediation

A blue staircase graphic with a circular dot at the end of each step, leading to the third service item.

High Level Security oversight covering several key areas

A blue staircase graphic with a circular dot at the end of each step, leading to the fourth service item.

Weekly Active Directory reviews of Privileged Groups and Policies

A blue staircase graphic with a circular dot at the end of each step, leading to the fifth service item.

SIEM and Daily Incident, Detection and Response services along with Log Correlation

A blue staircase graphic with a circular dot at the end of each step, leading to the sixth service item.

Access review of rights against CISO, CEO, CFO, CTO Level AD users permissions

5 Reasons to use an MSSP

- 01** Using it as an Operational Expense (**Op Ex**) versus a Capital Expense (**Cap Ex**).
- 02** Guaranteed Services **versus** having security staff resign.
- 03** A fraction of the cost ratio instead of hiring 2 mid level security engineers. Ranging from 120-140k per employee with 30k in benefits and training estimated at 300-340k annually.
- 04** Delegating Cybersecurity to an MSSP to Focus on Business.
- 05** Benefiting from Security Experts with a vast number of different environments and infrastructures.

COST CALCULATOR

2 Mid-Level IT
Security Engineers
